

M

INTRODUCTION

I am Marija Đurđević, a multidisciplinary designer from Serbia. Throughout my professional career, I had the opportunity to work, acquire skills and knowledge in various disciplines. I started with Interior and furniture design when my career migrated toward Digital design. Since then, I've been working on different projects in the field of UI/UX design, Brand Strategy and Development, Web and App design, 3D and 2D design and animation.

I embrace all design disciplines with a profound love and enthusiasm but thrive most when I can leverage my skills and knowledge across different realms, creating meaningful and impactful designs.
